

## **Taxpayers Paid For 329,445 Abortions**

Gary McDade

The 329,445 number of abortions only represents those funded by United States taxpayers through the Planned Parenthood Federation of America (PPFA). (And, that number represents 11 percent of the PPFA's customers serviced during the same period of time. The latest annual report from PPFA which included these numbers covers the period July 1, 2009, to June 30, 2010, the PPFA's fiscal year). How much did 329,445 abortions cost US taxpayers? Of the \$1,048,200,000 total revenue for PPFA during the same period, \$487,400,000 was supplied out of the pockets of US taxpayers, which represents 46.5 percent of PPFA's total budget. (From: "Combined Statement of Revenue, Expenses and Changes in Net Assets," Planned Parenthood Federation of America, Annual Report 2009-2010 at [www.plannedparenthood.org](http://www.plannedparenthood.org)).

### **Exporting the Misery**

In the Annual Report, Valerie McCarthy, PPFA Chair, and Cecile Richards, PPFA President, stated, "The year was also one in which Planned Parenthood reached out in important ways to the global community. In 2009-2010, Planned Parenthood provided \$1.6 million in grants to 48 partner organizations in Africa, Asia, Latin America, and the Caribbean, enabling the delivery of reproductive health care to more than 655,000 women and adolescents. An additional 245,000 women, men, and young people participated in sex education programs supported by these grants in several nations."

### **What's Wrong With This Picture?**

As everyone knows, the United States is 15 trillion dollars in debt. That's \$15,000,000,000,000. How does that number skyrocket so swiftly? In part by adding almost half a billion every year to fund abortions. The PPFA is doing so well it can export \$1,600,000 a year overseas impacting nearly a million people on foreign soil with these "values" which in turn strengthens its political clout here at home. The US Congress teeters on the verge of a government shutdown every few months it seems when budgetary discussions reach a deadlock. Expenditures like this do not need a magnifying glass to discover; they are, in fact, part of a destructive agenda for American society. What happens when approximately 1,500,000 potential citizens annually are terminated before they have a chance to take a breath? Since Roe V. Wade legalized abortion in 1973, do you realize that 58,500,000 abortions have taken place? Americans are not learning to behave better by practicing morality; they are systematically being taught that clinical genocide is morally acceptable. In an amoral society money is all that matters, so look at what the loss of nearly sixty million potential taxpayers—27,000,000 of whom would by now be 21 years of age and contributing to the tax base—costs America, and you can monetarily quantify the damage abortion is doing to the country.

### **A Far Greater Consideration**

When Joseph's brother Ruben thought the irresponsible actions he and his other brothers had taken against Joseph resulted in his death, he said to them, "Spake I not unto you, saying, Do not sin against the child; and ye would not hear? therefore, behold, also his blood is required" (Genesis 42:22). If the apparent loss of one child would bring such severe consequences on the perpetrators, think of the responsibility we, as a nation, bear for the loss of 58,500,000! "Do not sin against the child." Are you listening?
